Sites Pending Annotation Review

Disclosed sites by country — top 10

What this evidence can establish

Presence: Disclosed sites show manufacturing locations, not procurement spend, production volume or available capacity.
Comparability: WP001's Data Sufficiency Gate found that disclosure-boundary changes prevent a defensible company-wide allocation recommendation.
Review status: Annotations flag pending evidence reviews, not automatic failures. SC is undefined; unannotated sites are not automatically cleared.
Eligibility: Myanmar remains excluded from the proposed sourcing programme.

Sources: NEXT Tier 1 supplier disclosure (2026); WP003 standardisation; WP006 SQL exports. Evidence boundaries: WP001. Responsible-sourcing gates: WP007.

Category economics: prices depend on the screen

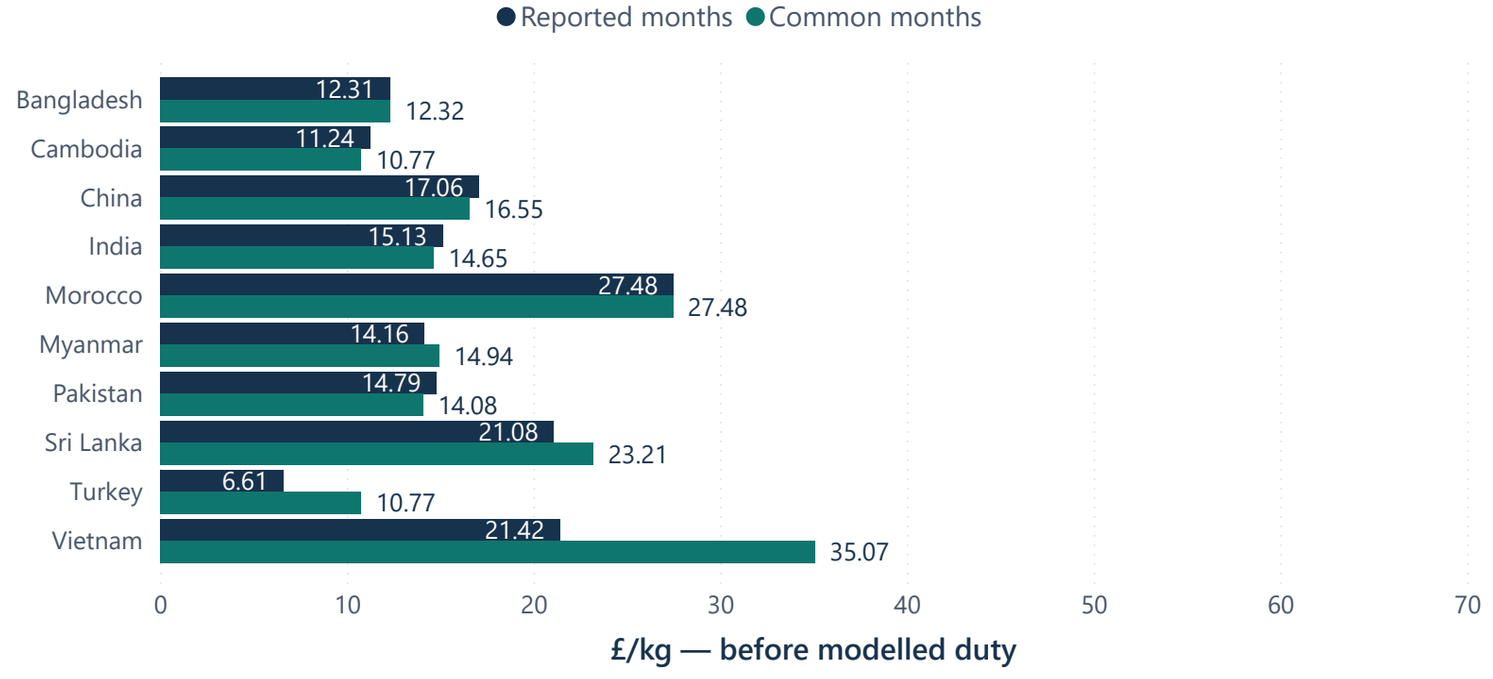

UK import unit values are external benchmarks. They are not supplier quotations or verified landed costs.

Category: MMF knitwear

Trade period: H1 2026

Reported: all reported months in the selected period.
Common: matched months retained by the quality screen.
Price differences can reflect product mix, timing and data quality.

UK import unit value by country (£/kg)

Archived tariff assumptions

Country	Pre-15 Jul 2026	From 15 Jul 2026	MFN fallback
Bangladesh	0.0%	0.0%	12.0%
Cambodia	0.0%	0.0%	12.0%
China	12.0%	12.0%	12.0%
India	9.6%	0.0%	12.0%
Morocco	0.0%	0.0%	12.0%
Myanmar	0.0%	0.0%	12.0%
Pakistan	0.0%	0.0%	12.0%
Sri Lanka	0.0%	0.0%	12.0%
Turkey	0.0%	0.0%	12.0%
Vietnam	0.0%	0.0%	12.0%

Preferences require origin and eligibility evidence. Tariff dates stay fixed when the trade period changes.
Myanmar is a trade benchmark only; it remains excluded from sourcing proposals.

Sources: HMRC UK trade data via WP006/WP009; archived tariff evidence in WP004. Quality screens: WP009. Sourcing exclusions: WP007/WP010.

Scenario trade-offs: cost and concentration

No basket-level saving survives all 26 cases; category outcomes depend on the assumptions.

Category

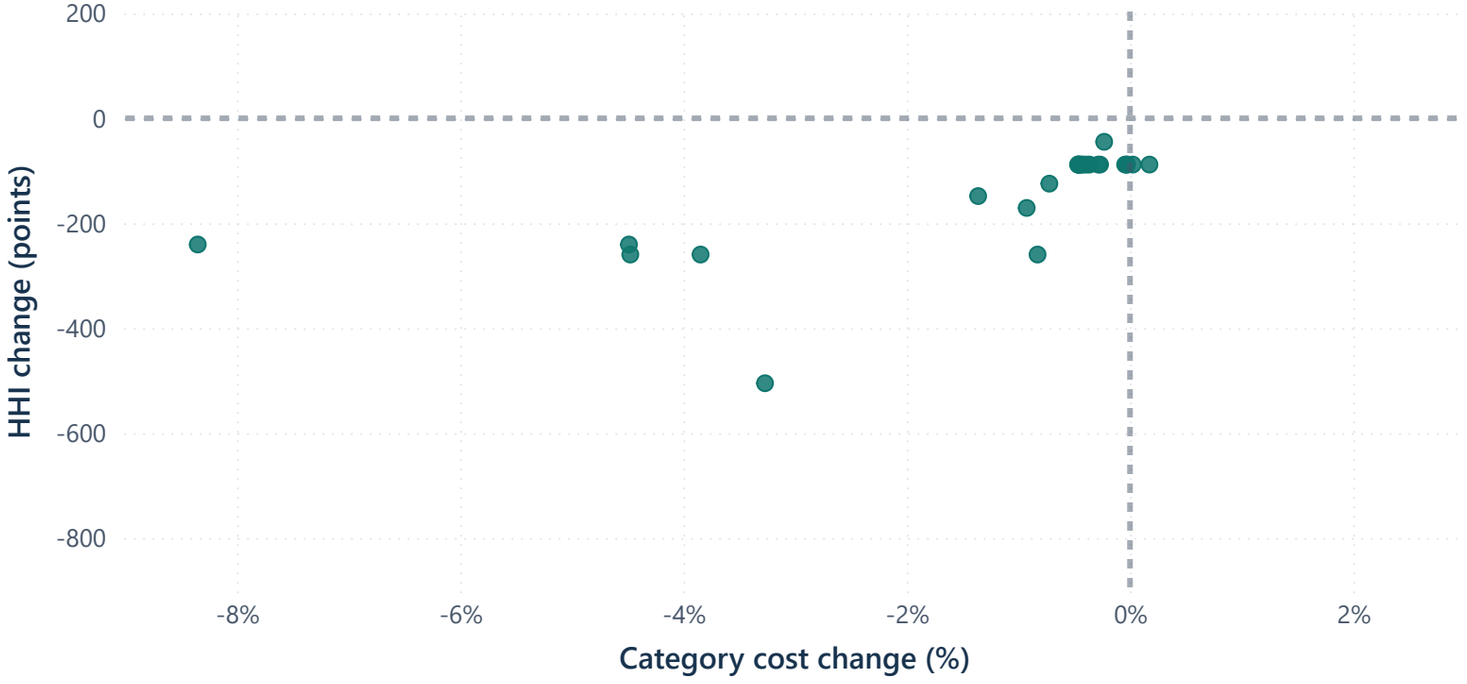

MMF knitwear

Case

25

Case selects the details panel. Hover over chart points to inspect cases.
HHI: ten-country mass shares. Identical results can overlap.

Cost versus concentration — tested scenarios

Selected case — assumptions

Scenario details

Case 25 | Presence mix, common months | H1 2026 | Common

Selected category — results

Cost change	HHI change	Transfer (pp)
-4.49%	-240.6	10.00

Basket sensitivity — all 26 cases

Cases tested	Equal: saving	Value: saving	Sign differs
26	10	17	7

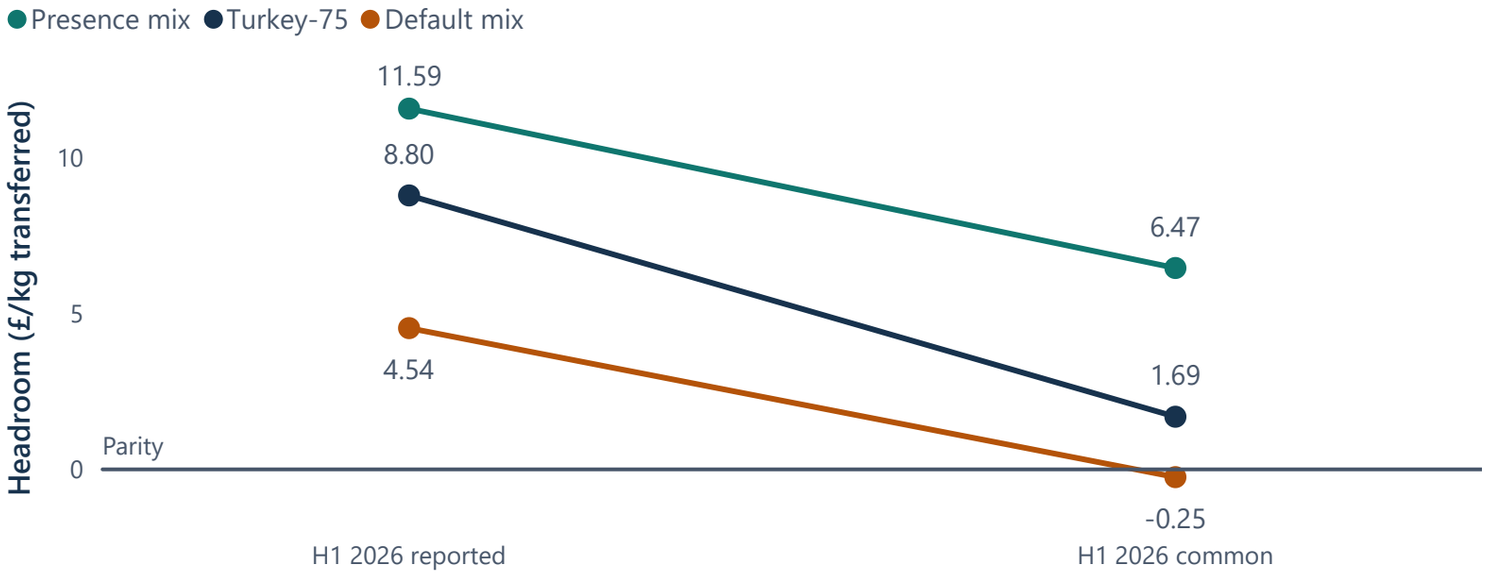

Scenario counts, not probabilities.

Sources: WP009 Sensitivity and Break-Even v1.1; WP010 Recommendation Evidence v1.1. Illustrative allocations and external trade benchmarks, not NEXT procurement shares.

Advance two synthetic options to validation

Two categories advance to commercial validation. Two close within the tested scope.

Knitwear headroom: mix and price screen

Presence mix: Turkey 16.35% → 25.64%; China 36.61% → 26.61%.
~93% of transfer goes to Turkey.
Cases 8/25 also transfer cotton; those transfers are not endorsed.

ADVANCE · PRIORITY ON HEADROOM

Turkey-led knitwear

Headroom (£/kg)	ΔHHI · 10pp transfer
6.47	-240.6

Case 25 · common months · premium to parity 53.60%

ADVANCE · LARGER HHI REDUCTION

India / Vietnam dresses

Headroom (£/kg)	ΔHHI · 10pp transfer
1.35	-635.8

Default · both screens · premium to parity 4.56%

CLOSE · Cotton T-shirt diversification proposal
Every active transfer increases HHI; costs vary.

REJECT · Tested cotton-shirt blend
All 22 active cases worsen both cost and HHI.

Before allocation: pass mandatory sourcing/origin requirements; validate quotes, capacity and delivery; retain a concentration benefit.
Stop: at the agreed review date, stand down if neither synthetic option clears commercial and mandatory requirements.
Reopen only after material changes to quotes/costs, capacity, exposure, policy/origin rules, candidates or gate evidence.

Sources: WP009 v1.1; WP010 v1.1. Headroom assumes eligible duties and no added operating costs. External benchmarks, not supplier quotes or allocation approvals.
